

South Elevation (Street Scene from West View)

Street Scene - George Street

Street Scene - B5070

An architectural elevation drawing of a single-story house. The house features a gabled roof with a brick pattern. The exterior walls are light-colored with a stippled texture. On the left side of the house, there is a small rectangular window with a dark frame. Next to the window is a single door with a dark frame and a small transom window. To the right of the single door is a double door with dark frames and transoms. A small, dark, rectangular object, possibly a mailbox, is mounted on the wall between the single and double doors. The house is surrounded by landscaping: a tall, thin, light-colored tree or shrub is on the far left, and a smaller, rounded, light-colored shrub is on the far right. A dark metal fence runs along the front of the property, with a gate section in front of the single door. A utility pole is visible on the far left, and a power line runs across the top of the drawing. The ground is represented by a solid dark line at the base of the house.
