

Dear PEDW,

I am writing to address the application at Burgess Lane, Penley, Wrexham. My family and I object to the cattle shelter being used as a farm waste collection, storage and distribution site.

We have a herd of Alpacas and we appreciate the quiet country setting of our home. We also have a daughter with a horse. All our animals benefit from a safe and tranquil country setting so they can thrive. We do not want busy industrial traffic using our lanes. My daughter and her local friends go on peaceful hacks on their horses to the nearby bridlepath. This is along the lane that the proposed agricultural waste depot would be, it would not be safe for the horses if the traffic on this lane increased to an industrial level. There are many footpaths along this lane and there is little space for pedestrians to use if confronted with industrial traffic. During lockdown many of us have jogged and walked along these footpaths and we need to feel safe. These narrow and winding lanes are not safe for an increase of industrial traffic.

Yours sincerely

Roz Edwards
