Response NRW:08540922

Dear Sir / Madam,

Thank you for consulting Natural Resources Wales on the above application.

We have reviewed the planning application submitted to us, and from the information provided we do not consider that the proposed development affects a matter listed on our Consultation Topics, Development Planning Advisory Service: Consultation Topics (September 2018): <https://naturalresources.wales/guidance-and-advice/business-sectors/planning-and-development/our-role-in-planning-and-development/our-role-in-planning-and-development/?lang=en>. We therefore do not have any comment to make on the proposed development.

Please note that our decision not to comment does not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

In line with our [Planning Position Statement](#), any proposed development that might increase the amount of phosphate (or phosphorus) within a river SAC catchment should be screened through a Habitats Regulations Assessment (HRA), to determine whether it is likely to have a significant effect on the SAC. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

We note the application, as submitted, proposes a domestic extension, i.e. an extension to a dwelling house comprising a single household. Please note, we do not consider that a potential change in the number of inhabitants of the property should in itself justify the triggering of likely significant effects on a European Site, unless there is a material change of use connected to or arising from the change in occupancy or if the use resulting from the change in occupancy cannot be said to be incidental to the enjoyment of the dwelling house - this will be a planning judgment for your authority to make. Ultimately it is a matter for you, as Competent Authority, to satisfy yourselves that the proposed development will not result in a significant effect on the SAC. Therefore, should your Authority conclude that the proposal is likely to have a significant effect on the River Dee and Bala Lake SAC, please consult us on your appropriate assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

We trust that the above comments are of assistance however, should you have any queries, please do not hesitate to contact me.

Kind Regards
Rachel Burke
