Reason for Refusal: The proposed development would result in an increase in phosphate levels which would be harmful to the River Dee and Bala Lake Special Area of Conservation (SAC). The proposal is therefore contrary to paragraph 6.4.18 of Planning Policy Wales and Policy EC6 of the Wrexham Unitary Development Plan.

The development would not add any phosphates as it would be rented to people already living in the area - stipulation is that these properties are to rent for the local population. These people already use the sewage system and therefore it would not increase the amount of Phosphates. They would simply be using a different toilet and the waste would still be entering the Five Fords Treatment Plant. We would also contest that the amount is de minimis when considering the size of the dwellings and number of occupants (potentially 6 people, possibly 3.) We also contest that the exact wording relates to the following:

"No part of the development shall commence until a scheme for the comprehensive and integrated drainage of the site indicating how foul water, surface water and land drainage will be dealt with has been submitted to and approved in writing by the local planning authority. The scheme as approved shall be implemented in accordance with timescale to be agreed as part of the submitted details and maintained thereafter."

We have provided a scheme that relates specifically to the physical elements of the drainage strategy these have been approved by Dwr Cymru. We have indicated how the water, surface water will be dealt with. This again was accepted by Dwr Cymru. We have not been asked to provide a chemical analysis and report on Phosphates. It seems to be effectively adding a condition in retrospect which has no legal position in
