	Combined sewer overflow		Special purpose chamber		Rising main
	Combined sewer overflow		Special purpose chamber		Gravity sewer
	Combined sewer overflow		Special purpose chamber		Private sewer
	Combined sewer overflow		Special purpose chamber		Private sewer subject to Sect. 104 adoption agreement
	Combined sewer overflow		Special purpose chamber		Private Sewer Transfer
	Combined sewer overflow		Special purpose chamber		Lateral Drain
	Combined sewer overflow		Special purpose chamber		Inspection Chamber
	Combined sewer overflow		Special purpose chamber		

Notes:

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation.

Dŵr Cymru Cylfyngedig (the Company) gives this information as to the position of its underground apparatus by way of general guidance only and on the understanding that it is based on the best information available and is not warranted as to its correctness or relied upon in the event of excavations or other works made in the vicinity of the company's apparatus. The error of location of apparatus is liable to vary and any excavations made entirely on your own. The information which is supplied by the Company is given so in accordance with statutory requirements of sections 103 and 109 of the Water Industry Act 1991 which is based upon the best information available and, in particular, but without prejudice to the generality of the foregoing, it should be noted that the records that are available to the Company may not include the existence of water mains, storm sewer, lateral drain or disposal main and any excavation should be made in accordance with the provisions of the Water Industry Act 1991 and the Company's right to be compensated for any damage to its apparatus.

Service pipes are not generally shown but their presence should be anticipated.
