

NS - Native species of large mature stature (Quercus, Pinus, Betulus) should be positioned to the boundaries

Badger sett. Refer to edcuk details for design

2m clear distance between retaining wall structure and house

Badger access point through retaining wall. Refer to edcuk details

#### House Types

- 2 x 2B3P Bungalow
- 2 x 1B2P Bungalow
- 24 x 2B4P
- 6 x 3B5P

#### Site

- Land Registry Boundary

#### Levels

- Existing levels
- Proposed levels

#### Drainage

- Surface Water Drainage
- Foul Water Drainage

Assumed locations of existing drainage runs underground installed during previous development

#### Notes

A Shed is to be provided to back garden of each house plot to act as sufficient space to provide at least 2 secure cycle parking spaces per dwelling

NS - Native species of large mature stature (Quercus, Pinus, Betulus) should be positioned to the boundaries

(MSP) medium sized species Acer campestre, Ilex, Crataegus, Corylus etc) planted in more central locations at a suitable distance from residential boundaries to avoid potential nuisance issues of encroachment and shading.

#### Landscape Scheme - Works on Site

The landscaping scheme will be implemented within three months of the first use of the development, with the exception of the soft landscaping which shall be carried out in the first planting season (November to March) or seeding season (April to September) following the first use.

#### \* Landscape Buffer Zone access

Access requested by the local authority ecologist to allow for access for maintenance.

Access agreed with the local authority by Anwyls and Pricipal Designer, Integrated Health and Safety Ltd. Location TBD on site

- Access via a galvanised/stainless steel, heavy duty wall plate with hooks bolted to the retaining wall to allow for a portable ladder to be hooked up to gain access to the top of the wall where there will be a lockable gate.
- Access will be provided to the area via this location annually for Wales and West to inspect the landscaping and carry out any necessary maintenance.

#### Landscape Buffer Zone Planting

Wildflower seeds to cover all areas

Substantial planting is required to the buffer zone areas with planting of native trees and understorey species within both the south-west and west buffer zones. (NS) Native species of large mature stature (Quercus, Pinus, Betulus) should be positioned to the boundaries with (MSP) medium sized species Acer campestre, Ilex, Crataegus, Corylus etc) planted in more central locations at a suitable distance from residential boundaries to avoid potential nuisance issues of encroachment and shading.

#### General Notes

- Contractor to verify all dimensions and check level datums on site
- All of the designs are the sole property of TACP Architects Ltd and may not be used without their written agreement
- All prints, specifications and their copyright are the property of TACP Architects Ltd
- Do not scale off drawings
- All dimensions shall be checked on site before commencement of shop drawings, manufacture and all discrepancies must be reported to TACP Architects Ltd

#### Hard & Soft Landscape Key

##### Soft Landscape

- Grass
- Landscape Buffer Zone
- Shrubbed Area
- S - Slate Chippings
- Small feature tree Total 12

T1 - Betula Albosinensis X 3  
Size 10-12cm girth

T2 - Fugi Cherry (Prunus Incisa) X 3  
Size 1.75m - 2m when planted

T3 - Crataegus Prunifolia 'Splendens' X 3  
Size 10-12cm girth

T4 - Amelanchier Arborea 'Robin Hill' X 3  
Size 8-10cm girth

##### Note

Trees to the front of ALL properties to be sectioned/edged, slate chippings and membrane installed around trees

##### Hard Landscape

- TR - Tarmac Road
- TD - Tarmac Driveway
- Contrasting concrete edgings to all edges of driveway to be provided for delineating parking spaces. Edgings to be level with finished tarmac surface
- TP - Tarmac Pavement
- PF - Paving Flags  
Rear Patio and rear access paths

#### Risk Assessments
