Re McDonalds – Wrexham ref P2019/0919

I strongly object to the above planning application under the following points.

The roundabout into Wrexham is gridlocked every day without extra traffic exiting the by-pass to use a drive through.

Police, Fire and Ambulance crews have a tough enough time as it is trying to get through the traffic without more being added.

As the area is supposed to be the gateway to Wrexham it would not enhance the area at all.

There is already refreshments on site with a Costa Coffee, the Plas Coch Pub as well as the Sainsbury's café and Garage shop.

The air pollution is already bad with car fumes and wood burners in the area, some days its that bad you can taste it let alone smell it. (even in the houses on time)

There is also the extra litter that would be discarded no matter how many bins were supplied,(most of which would end up in my drive due to wind direction)

Extra noise in the evening/night time as youngsters would congregate around there, plus it is encouraging unhealthy eating. I know McDonalds sell so called healthy options, but how many actually go for it.

And finally

Has anyone in Cardiff actually been to Wrexham to see how congested this area is with all the traffic.

I will be very disappointed in the Welsh Government if they allow the go-ahead on this, and if they do, it will only go to prove that money matters more than peoples quality of life.

Regards

Susan Evans
