

Notes

- THIS DRAWING IS TO BE READ IN CONJUNCTION WITH ALL OTHER RELEVANT ARCHITECTS, ENGINEERS AND SPECIALISTS DRAWINGS TOGETHER WITH THE APPROPRIATE SPECIFICATIONS.
- IT IS THE CONTRACTORS RESPONSIBILITY TO CHECK ALL DIMENSIONS ON SITE. DIMENSIONS MUST NOT BE SCALED FROM THIS DRAWING. ANY DISCREPANCIES TO BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE ARCHITECT IN WRITING.
- ALL DIMENSIONS ARE IN MILLIMETRES UNLESS NOTED OTHERWISE.
- ALL LEVELS ARE IN METRES, UNLESS NOTED OTHERWISE.

Earthworks Notes

- Levels shown on this drawing are based upon topographical survey 'S20-639 Topographical Survey 3D' undertaken by J.P. Surveying, received 02.06.2021.
- Levels shown on this drawing are based upon Architects Layout '19153-CP-AN-22-08-A-0015_P4_Site Plan as Proposed' undertaken by CA, received on 19.05.2021.
- Where 3D topographical survey information is not available, Environmental Agency LiDAR survey has been used, which has an accuracy of +/-150mm.
- Level and earthworks shown on this drawing are indicative and for information only. Proposed finished levels are based on achieving an approximate cut and fill balance and will change following receipt of further information and detailed design.
- No allowance for unsuitable site strip material has been made in this model. Existing hard standing areas are assumed to be excavated, crushed and set aside for reuse.
- Formation levels have been taken as an overall thickness of 450mm at this stage and are dependent upon site investigation results.
- No building factors have been taken into account in calculating the earthworks quantities.
- No allowance has been made for unacceptable materials being exposed during excavation.
- The earthworks quantities provided below are for guidance only.
- It should be noted that the earthworks volumes provided are accurate to 5%. This margin takes account of the variations that may result through the use of Civil 3D.

Legend
