

We strongly object to the proposal to place a McDonalds drive through / restaurant on the proposed site as this is already a very congested area without the extra traffic that it would create.

The area is already high in toxic fumes from queuing traffic, and this pollution has been added to by wood burners from surrounding houses over recent years without the toxicity that would be added from the extra traffic created.

Then there is the issue of litter which is also already a problem, and as this is supposed to be the gateway to Wrexham it would not enhance the area either.

We understand that money and big businesses usually override any objections that people living in an area may have, but as it will affect the quality of the lives of those people i hope the appeal will be refused and the planning permission turned down.

Mr & Mrs J Mulvaney
