

Any discrepancies that are to be found on this drawing should be highlighted and to be brought to the attention for clarification. All works should be completed by a proficient contractor; although, the following notes are risks that may be accordance with this drawing:

- Uncharted Surveys
- A single line that is outlined on this drawing can represent more than one service.
- Services that have not been allocated on this drawing, possibly could still be there although this does not mean that they do not exist or are abandoned. Their presence should still be considered. .
- there is no indication to whether a service is live or not given. Consult all necessary statutory plans and confer with authorities prior to construction.
- Utilities owned by various (other) statutory undertakers and also privately owned, may be present in the area. Information with regard to such owned utilities should be gathered and discussed with the owners.
- Safe digging practices, as can be found in the Health and Safety booklet 'Avoiding danger from underground services', must be used to establish the actual position of mains, services and other plant on site prior to any mechanical plant being used. It is the Developers & Contractors responsibility to enhance the needs of appropriate information is included when found to be digging in the proximity of the specified utility
