**Attachments:** P-2021-0884 NRW Response 05-01-2022.pdf

Good Afternoon Simon,

Thank you for your email regarding the above site.

Our original response to this case requested further information in relation to the foul drainage proposals due to the site being within the phosphate sensitive catchment for the River Dee and Bala Lake SAC. Further information was submitted to us on 20<sup>th</sup> December 2021 which confirmed there would be no net increase in staff at the site as a result of the proposal. We therefore provided a revised response dated 5<sup>th</sup> January 2022 which confirmed that we are satisfied the proposal is not likely to have a significant effect on the River Dee and Bala Lake SAC.

As no new information appears to have been submitted since then, we consider that our advice dated 5<sup>th</sup> January 2022 (our ref CAS-178331-V5X4) remains valid for the above planning application – a copy is attached for ease of reference.

Regarding your wider query on employment-related applications and phosphates, should you wish to re-consult us on any employment-related applications following the publication of new guidance we will provide you with an updated response on a case by case basis.

Please let me know if you have any further queries regarding this.

Kind regards,

Rachael
