Approximate sweep of shade cast by trees in midsummer, plotted as per description in BS5837: 2012

*An indication of potential direct obstruction of sunlight can be illustrated by plotting a segment, with a radius from the centre of the stem equal to the height of the tree, drawn from due north-west to due east, indicating the shadow pattern through the main part of the day.

NOTE: Tree/group numbers marked with an * have approximate locations.
