Combined sewer overflow	Special purpose chamber	Storm Overflow
Private sewer	Private sewer subject to Sect. 104 adoption agreement	Rising main
Pumping station	Private Sewer Transfer	Gravity sewer
	Lateral Drain	Private sewer
	Inspection Chamber	

Notes:

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation.

Dŵr Cymru Cynnyddu (the Company) gives this information as to the position of its underground apparatus by way of general guidance only and on the understanding that it is based on the best information available and is not warranted as to its correctness in relation to the event of excavations or other works made in the vicinity of the company's apparatus. The error of location of apparatus is not intended to be a warranty, but without prejudice to the generality of the foregoing, it should be noted that the records that are available to the Company may not indicate the existence of water mains, surface water, sewer, lateral drains or other apparatus and any excavation should be made in accordance with the provisions of the Water Industry Act 1989 and the provisions of the Water Industry Act 1989 and the provisions of the Water Industry Act 1989 and the provisions of the Water Industry Act 1989.

Service pipes are not generally shown but their presence should be anticipated.

**EXACT LOCATIONS OF ALL APPARATUS
TO BE DETERMINED ON SITE.**
