

P/2021/1162 Burgess Lane Penley

With regard to the further information required from Highways I can give the following answers.

Most of the plastic will be delivered by farmers using mostly pick up type vehicles the biggest will probably use a trailer as well if required. As it is at the moment, we probably receive one to two deliveries per week from farmers.

HGVs will only use the burgess lane when the plastic needs Baling, and as I understand it that only happens when there is enough to give the baler/HGV a day's work. That will probably be twice a year, the baled product is then removed from site and the storage process starts again.

Highways have stated that there isn't 33mtr splay in the Northly direction due to the hedge causing an obstruction. I am waiting for my hedge cutting contractor to come a cut the hedge as it hasn't been done since last year. He has promised me that he will get to me in the first couple of weeks in the new year, so the problem should hopefully then be addressed and the required Visibility will then be achieved.

I hope I have addressed Highways concerns, if any more information is required or another site visit then please let me know.

Kind Regards,

Andrew Reeves.
