| RED | - Combined | | Lateral Drain |
| GREEN | - Surface Water | | Inspection Chamber |
| BROWN | - Foul | | |
| Purple | - Former S24 sewers (for indicative purposes only) | | |

Notes:

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation.

Dŵr Cymru Cynhyrchu (the Company) gives this information as to the position of its underground apparatus by way of general guidance only and on the understanding that it is based on the best information available and is not warranted as to its correctness in relation to the position of excavations or other works made in the vicinity of the Company's apparatus. The error of location of apparatus is liable to vary and any excavations made should be made on the basis of the information provided by the Company, as shown on the map, and in accordance with the requirements of sections 103 and 109 of the Water Industry Act 1991 which is based upon the best information available and, in particular, but without prejudice to the generality of the foregoing, it should be noted that the records that are available to the Company may not indicate the existence of water mains, service pipes, drains, lateral drains or other apparatus and any excavation should be made in accordance with the provisions of the Water Industry Act 1991 and the Company's rights to be compensated for any damage to its apparatus.

Service pipes are not generally shown but their presence should be anticipated.

**EXACT LOCATIONS OF ALL APPARATUS
TO BE DETERMINED ON SITE.**
