Dear Sir/Madam,

PROPOSAL: INSTALLATION OF 2 PODS FOR HOLIDAY LET WITH PARKING TO EACH SIDE OF POD

LOCATION: ZENITH POINT, PEN Y BRYN, PEN Y CAE, LL14 1TY

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 6th January 2022.

We continue to have concerns with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, you should seek further information from the applicant regarding foul drainage. If this information is not provided, we would object to this planning application. Further details are provided below.

We also advise that based on the information submitted to date, the document identified below should be included in the approved plans and documents condition on the decision notice. Without the inclusion of this document we would object to this planning application.

- Susan Worsfold, 18th September 2021, Ecological Appraisal and Impact Assessment at Zenith Point.

Foul Drainage and Protected Sites

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphate levels for all river SACs across Wales. As part of this package, we issued a [Planning Position Statement](#), in which we advised that any proposed development that might increase the amount of phosphate within a river SAC catchment could lead to damaging effects to the SAC. Therefore, such proposals should be screened through a Habitats Regulations Assessment (HRA), to determine whether they are likely to have a significant effect on the SAC. We have also issued [Planning Advice](#) (May 2021) which gives specific advice in respect of foul drainage arrangements for new developments.

We note from the information submitted that a private sewage treatment system discharging domestic wastewater to ground is proposed. We note the plan has been updated however, we advise you to seek further information as identified in the section titled 'does this mean for development proposals involving private sewage treatment systems' of that advice. We require the location of the drainage field, percolation test results and confirmation if a septic tank or package treatment plant is to be utilised

It should also be noted that our Planning Advice states:

“Also, to ensure that there is no significant in combination effect, the discharge to ground should be at least 200m from any other discharge to ground. The density of discharges to ground should also not be greater than 1 for every 4ha (or 25 per km²).”

In light of the above information, we advise that your Authority should screen the proposal through a HRA. Should you determine that an Appropriate Assessment is required, the Applicant will then need to submit whatever evidence they deem appropriate (seeking advice from consultants as may be necessary) to demonstrate no adverse effect on site integrity. You should then consult us on your Appropriate Assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

We advise the Applicant to contact our Permitting Team on 0300 065 3000 at the earliest opportunity, to try to ensure that there is no conflict between any planning permission granted and the permit requirements. It is important to note that a grant of planning permission does not guarantee that a permit will be granted, should a proposal be deemed to be unacceptable (either because of environmental risk or because upon further investigation, a connection to mains sewer was feasible). The Applicant should ensure that they have all the required permissions, consents, permits and any other approvals in place prior to commencement of works on the site.

More information, including a step by step guide to registering and the relevant application forms are available on our [website](#). Where private sewage treatment/disposal facilities are utilised, they must be installed and maintained in accordance with British Standard 6297 and Approved Document H of the Building Regulations. We also refer the Applicant to Guidance for Pollution Prevention 4 on the [NetRegs website](#), which provides further information.

European Protected Species

We note that the ecological report submitted in support of the above application (Susan Worsfold, 18th September 2021, Ecological Appraisal and Impact Assessment at Zenith Point) has identified that bats are foraging and commuting at the application site, and it may also have potential for Great Crested Newts. Bats and Great Crested Newts along with their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017 (as amended).

We consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in their natural range.

Furthermore, we advise that the proposed development is not likely to harm or disturb the protected species or any breeding sites and resting places at this site, provided the avoidance measures described in the ecological report are implemented.

The report must be included in the 'approved list of plans / documents' condition within the decision notice should consent for the project be granted.

Please consult us again if any further information shows that this is no longer a lower risk case.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yours faithfully

Ruth Prichard
