

Denbighshire

Published 1873

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Published 1881

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from the earlier sources. The maps appear unfinished - with all railway camps and stations and all magic sites removed. These maps were initially overprinted with the National Grid in 1970, the first revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Published 1914

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840s, i.e. 1:625,000. The scales used for mapping urban areas; these maps are known as the 1:25,000 scale series, were first produced by Ordnance Survey in 1907. This information is included to update the 1:625,000 scale maps. The map information is often some years later than the original data. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant distortions, especially around the coast. In the late 1940's a Provisional Edition was produced, which updated the 1:625,000 mapping from a number of sources. The maps were still uncompleted, with all military camps and other strategic sites removed. These maps were initially overlaid with the National Grid. In 1970, the first edition of the 1:25,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.
