Dear Sir/Madam,

Site: Halton Farm, Halton, Chirk
Development: Erection Of Slurry Store And Associated Works

We refer to your planning consultation relating to the above site, and we can provide the following comments in respect to the proposed development.

The proposed falls within a Dwr Cymru Welsh Water (DCWW) drinking water catchment 'River Dee' which is designated as a Drinking Water Protected Area under Article 7 of the Water Framework Directive. This Article requires the UK to take action to protect drinking water sources. Section 7.3 states that the aim is 'to avoid deterioration in water quality where this may lead to additional purification treatment being required'.

The proposed structure and storage is ~39km up stream of our abstraction point at Bretton WTW.

DCWW understands that this proposal is to improve the existing slurry management system.

DCWW would like to request further information from the applicant to assess the impact of the proposed development on drinking water quality:

1. Manure Management Plan
2. Is there a nutrient management plan in place and what mitigation is there for when indexes for Phosphorous exceed Index of 4.

With regard to this application, Dŵr Cymru Welsh Water presumes that the applicant has consulted relevant authorities, including Natural Resources Wales, to ensure compliance with current regulations and best practice guidelines are being followed in respect to any new building and maintenance of this installation.

DCWW would like to reiterate to the applicant that the facility is within a Drinking Water Catchment and trust that all the particulars will be followed.

Our response is based on the information provided by your application. Should the proposal alter during the course of the application process we kindly request that we are re-consulted and reserve the right to make new representation.

If you have any queries please contact the undersigned on 0800 917 2652 or via email at developer.services@dwrcymru.com
