Hi Sharon,

Please find attached the report on manure storage requested by Natural resources Wales.

They also raised a number of questions in their comments dated the 14/09/2018 and the following should answer them.

All of the wash water is included in the store

We have amended the 80% of a milking cow group for November- February to 100% with the other months at 80% to account for grazing animals

Also the proposal is to now put in place a dirty water tank for the rainfall running off the forage storage completed before any development.

Let me know if you need anything more.

Kind regards,

Stephanie

Kind Regards
