Town and Country Planning (General Development Procedure) Order 1996

Re: P/2018/0677, PENLEY STORES UNIT 33 PENLEY INDUSTRIAL ESTATE PENLEY WREXHAM

PARTIAL CHANGE OF USE OF STORES TO PROVIDE ADJOINING LIVING ACCOMMODATION

ZP01B - Contaminated Land - Phased Investigation

It is noted that the proposed development is on the site of a former vehicle body shop. In light of this, it will be necessary to condition any future consent so as to ensure that any potential contamination issues are adequately dealt with. I would recommend that the following conditions and note to applicant be applied to any future consent that may be granted.

No development shall take place until a phased site investigation of the nature and extent of contamination has been carried out and submitted to and approved in writing by the Local Planning Authority. If any contamination is found during the site investigation, no part of the development shall commence until a scheme specifying the measures that will be taken to remediate the site to render it suitable for the development hereby permitted has been submitted to and approved in writing by the local planning authority. The site shall thereafter be remediated in accordance with the approved scheme. If during the course of development any contamination is found that has not been identified in the site investigation, no further development shall take place on those parts of the site where that contamination has been found until an additional scheme of remediation has been submitted to and approved in writing by the local planning authority for those parts of the site. The relevant parts of the site shall thereafter be remediated in accordance with the additional scheme of remediation.

ZP07 - TAN11 NOISE SURVEY REQUIRED (TO BE SUBMITTED)

No part of the development shall commence until a noise survey in order to determine noise levels for both day and night has been carried out, and a detailed report of the survey findings together with a detailed scheme of noise attenuation

and or noise insulation measures has been submitted to and approved in writing by the Local Planning Authority. The measures as are approved shall be fully implemented prior to the first occupation / use of the development.

A26N - TAN11 NOISE SURVEY ADVICE

The development site is in close proximity to industrial noise sources. The developer is therefore required to carry out a noise survey in connection with condition no. @@ in order to determine noise levels for both day (07.00 – 23.00 hours) and night (23.00 – 07.00 hours) having regard to Planning Guidance (Wales), Technical Advice Note (TAN) 11 – Noise. The report of the noise survey findings shall include:

- a) Noise levels arising from day/night time activities in the vicinity of the proposed development site and the impact upon the proposed accommodation, and
- b) A detailed scheme of noise insulation and / or attenuation measures so designed to safeguard the amenity of the future occupants of the proposed accommodation hereby approved.

ZP02A - Verification Report - Contaminated Land

Each part of the site subject to the remediation under the scheme(s) approved as part of condition @@ shall not be occupied/used until a Validation Report has been completed in respect of that part of the site and submitted to and approved in writing by the Local Planning Authority.

A11NA - SITE CONTAMINATION

Further advice on compliance with condition no. @@ may be obtained by contacting the Council's Environmental Protection Team on 01978 298989 or contaminatedland@wrexham.gov.uk. Should the investigation identify contamination issues that may affect receptors other than the site users e.g. groundwater, then it is recommended that these works are also addressed in consultation with the Council's Environmental Protection Team prior to commencement of works on site.
