Subject: P/2021/1200 - Open Space Adjacent To Benjamin Road Play Area, Wrexham, LL13 8EE (Minor) - NRW Response NRW:07141995

Dear Planning,

We have no objection to the proposed development as submitted and provide the following advice.

Protected Sites

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. As part of this package, we issued a Planning Position Statement, in which we advised that any proposed development that might increase the amount of phosphate (or phosphorus) within a river SAC catchment could lead to damaging effects to the SAC. Therefore, such proposals should be screened through a Habitats Regulations Assessment (HRA), to determine whether they are likely to have a significant effect on the SAC.

However, the application as submitted is unlikely to increase the amount of phosphorus entering the catchment. Therefore, we are satisfied that the proposal is not likely to have a significant effect on the River Dee and Bala Lake SAC.

Land Contamination

Natural Resources Wales considers that the controlled waters at this site are not of the highest environmental sensitivity, therefore we will not be providing detailed site-specific advice or comments with regards to land contamination issues for this site.

However, we do have reason to strongly suspect that contamination is present, and a preliminary risk assessment has not been submitted. In line with the advice given in Planning Policy Wales we understand that the Authority must decide whether to obtain such information prior to determining the application or as a condition of the permission.

Natural Resources Wales recommends that developers should:

1. Follow the risk management framework provided in [Land contamination risk management \(LCRM\)](#)
2. Refer to '[Land Contamination: a guide for developers](#)' (WLGA, 2017) for the type of information that we require in order to assess risks to controlled waters from the site. The Local Authority can advise on risk to other receptors, such as human health.
3. Refer to our [groundwater protection](#) advice on www.gov.uk

Protected Species

We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not *rule out the potential for the proposed development to affect other interests*.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Kind regards,
Tristan Williams
