

13/11/2018

For the attention of Sharon Holman:

Dear Sharon,

TOWN AND COUNTRY PLANNING ACT 1990
DEDDF CYNLLUNIO GWLAD A THREF 1990

PROPOSAL:

**AMENDED SITE LAYOUT AND SUBSTITUTION OF HOUSE TYPES ON PLOT NOS. 22
- 33**

LOCATION:

Bryn y Groes, Chester Road, Gresford, Wrexham

Thank you for consulting Natural Resources Wales (NRW) about the above, which was received on 26/10/2018.

NRW does not object to the proposal, however we would provide the following advice.

Protected Species

There are no material issues from a protected species perspective in respect of the substitution of house types. We have checked the consented and proposed layout for this part of the development site, and there does not appear to be any material issues from a protected species perspective. The appropriate conditions attached to the original permission should be reapplied to this permission where applicable.

Pollution Prevention

All works at the site must be carried out in accordance with PPG6: 'Working at construction and demolition sites' which is available on the following website:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Any work which is to take place should be done so with pollution prevention in mind. Pollution prevention advice and guidance can be found via this link:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Should any pollution occur during the construction or operational phase, Natural Resources Wales should be notified via the incident hotline – 03000 65 3000.

Waste

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provided information on how to classify waste and register as a waste carrier or hazardous waste producer:

<http://naturalresources.wales/waste/how-to-classify-and-assess-waste/?lang=en>

<http://naturalresources.wales/apply-for-a-permit/waste/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Please do not hesitate to contact us if you require further information or clarification on any of the above.

Our comments above only relate specifically to matters that are listed in our 'Consultation Topics' document (September 2018) which is published on our website:

(<https://cdn.naturalresources.wales/media/686847/dpas-consultation-topics-august-2018-eng.pdf?mode=pad&rnd=131819256840000000>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

Yn gywir / Yours sincerely,

Daniel Davies

Daniel Davies

Cynghorydd Cynllunio Datblygu / Development Planning Advisor
