Subject: P/2018/0723 & P/2018/0724 Talwrn Farm

Dear Sir,

I refer to our telephone conversation today regarding the above application.

As discussed, this proposal does not include any increase in traffic generation, but just seeks amendments to the restrictive conditions over the times and days of vehicle movements.

We are not seeking to operate the site in terms of deliveries 24 hours per day, but just seeking an amendment to the hours of delivery restriction, purely for the collection and delivery of birds.

This operation is best undertaken at night or in the early hours of the morning for animal welfare purposes. The RSPCA Information Sheet on poultry catching suggests that the birds are quieter at this time as they are resting and this helps to reduce stress during the process.

The proposals only relate to 4 bird deliveries and 4 bird collections per annum. The length of the flock cycle is approximately one year and therefore, in reality, this relaxation of the traffic movement time restriction only relates to 4 bird deliveries, and 4 bird collections per year.

Regards.

Ian.
