Annwyl Syr/Madam / Dear Sir/Madam,

**BWRIAD / PROPOSAL: TRAWSNEWID GAREJ A THY ALLAN YN ANNEDD
DDOMESTIG / GARAGE AND outhouse conversion into domestic dwelling**

LLEOLIAD / LOCATION: CHERRY RISE, PEN Y LAN, RUABON, WREXHAM (MAJOR)

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 20/07/2021.

We have concerns with the application as submitted. However, we are satisfied that these concerns can be overcome if the document identified below is included in the approved plans and documents condition on the decision notice:

- **Proposed conversion of garage and utility building at Cherry Rise, Pen y Lan, Wrexham. Wildbanks Conservation (June 2021)**

Protected Sites and Foul Drainage

We note the application site is within the catchment of the River Dee and Llyn Tegid Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. As part of this package, we issued a [Planning Position Statement](#), in which we advised that any proposed development that might increase the amount of phosphate (or phosphorus) within a river SAC catchment could lead to damaging effects to the SAC. Therefore, such proposals should be screened through a Habitats Regulations Assessment (HRA), to determine whether they are likely to have a significant effect on the SAC.

However, the application as submitted is unlikely to increase the amount of phosphorus entering the catchment. Therefore, we are satisfied that the proposal is not likely to have a significant effect on the River Dee and Llyn Tegid SAC.

under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

Protected Species

We note that the bat report submitted in support of the above application (Proposed conversion of garage and utility building at Cherry Rise, Pen y Lan, Wrexham. Wilbanks Conservation. June 2021)) has identified that bats are present at the application site. From the information submitted, we consider that the proposed development represents a lower risk for bats, as defined in our guidance document '*Natural Resources Wales Approach to Bats and Planning* (2015)'. Bats and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017 (as amended).

As this is a lower risk case for bats, we consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range.

Furthermore, we advise that the proposed development is not likely to harm or disturb the bats or their breeding sites and resting places at this site, provided the avoidance measures described in the bat report are implemented.

The report must be included in the 'approved list of plans / documents' condition within the decision notice should consent for the project be granted.

Please consult us again if any further information shows that this is no longer a lower risk case.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice for the Developer

Works near Watercourse / Construction or Demolition sites

Due to the proximity of the site to watercourses, all works at the site must be carried out in accordance with GPP5 and PPG6: 'Works in, near or over watercourses' and 'Working at construction and demolition sites' which are available on the following website:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Foul Drainage

The Applicant should be aware that to operate a private sewerage system, they will need to apply for an environmental permit or register an exemption with us. Septic tanks and small sewage treatment works may be registered as exempt from the requirement to obtain an environmental permit if certain criteria are met. Please note, should a permit be required, further information may be required as part of that application and the Applicant is therefore advised to hold pre-application discussions with our Permitting Team on 0300 065 3000, at the earliest opportunity, to try to ensure that there is no conflict between any planning permission granted and the permit requirements. It is important to note that a grant of planning permission does not guarantee that a permit will be granted, should a proposal be deemed to be unacceptable (either because of environmental risk or because upon further investigation, a connection to mains sewer was feasible). The Applicant should ensure that they have all the required permissions, consents, permits and any other approvals in place prior to commencement of works on the site.

More information, including a step by step guide to registering and the relevant application forms are available on our [website](#). Where private sewage treatment/disposal facilities are utilised, they must be installed and maintained in accordance with British Standard 6297 and Approved Document H of the Building Regulations. We also refer the Applicant to Guidance for Pollution Prevention 4 on the [NetRegs website](#), which provides further information.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully,

Rhys Jones
