Hi Sharon

Please find below the response to the comments made by Highways.

Current Traffic Movement and Predicated increase in traffic resulting from the increase in herd size at the site
[Haulage](#)

[Milk tanker once per day at Midnight which will not increase it will remain at one pickup](#)

[Feed deliveries 4 loads per month this would increase to 5,](#)

[Straw 1.5 deliveries which would increase to 2.](#)

[The products such as minerals and supplements would not increase as its just a case of increasing the load size](#)

Size of the existing herd - [Current herd size 550 \(includes 50 heifers which are entering the herd\)](#)

Proposed size of herd - [Predicted herd size 700](#)

I trust this is satisfactory and we will provide you with the response to Natural Resources Wales comments in due course.

Kind regards,
