Dear Mared

Thank you for the consultation on this application.

The only site recorded within the Historic Environment Record here is PRN 62219 Maelor Saesneg Pond 1202. This is either a natural pond, or the remains of a former marl extraction pit. It is of low archaeological value.

The Heritage Impact Assessment report records a possible small enclosure on the south west boundary of the site. This feature is in fact another former pond and one of a series that originally ran down the west boundary of the site on an old watercourse that has now been filled in. The pond clearly shows up a water filled feature on the 2006 Google Earth satellite imagery for the site. This feature is also of low archaeological value.

If possible the pond sites should be avoided within the proposed layout as part of the landscape design proposals.

We would have no objection to the proposed development and no further archaeological intervention is required.

Kind regards

Mark Walters
