

28/11/2018

Er sylw / For the attention of Matthew Phillips

Dear Mr Phillips,

**BWRIAD / PROPOSAL: OUTLINE APPLICATION FOR 1 NO. DWELLING ON
LAND ASSOCIATED WITH 33 WYNNSTAY LANE**

**LLEOLIAD / LOCATION: Rose Cottage, 33 Wynnstay Lane, Marford, Wrexham
P/2018/0959**

Thank you for consulting Natural Resources Wales about the above, which was received on 16/11/2018.

NRW has no objection to the above scheme.

Protected Species

We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Water Quality

The proposed development is in an area of bedrock aquifer. This designation is consistent with the Water Framework Directive and reflects the importance of aquifers in terms of groundwater as a resource (drinking water supply) and also their role in supporting surface water flows and wetland ecosystems.

In the event that surface water from the development discharges to ground, we refer the developer to the Groundwater Protection: Principles and Practice (Environment Agency, 2013) Position Statements. In particular, the developer should be aware that the advice under Position Statements G11 (Discharge from areas subject to

contamination) and G13 (Sustainable drainage systems) applies to this development:

(https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/658135/LIT_7660.pdf)

Please do not hesitate to contact us if you require further information or clarification of any of the above.

Our comments above only relate specifically to matters that are listed in our 'Consultation Topics' document (September 2018) which is published on our website: (<https://cdn.naturalresources.wales/media/686847/dpas-consultation-topics-august-2018-eng.pdf?mode=pad&rnd=131819256840000000>). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

Advice for the Developer

Waste:

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provided information on how to classify waste and register as a waste carrier or hazardous waste producer:

<http://naturalresources.wales/permits-and-permissions/waste/?lang=en>

<http://naturalresources.wales/permits-and-permissions/waste/waste-permits/?lang=en>

Further guidance can be found on the GOV website here:

<https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their

development.

Yours faithfully,

Joy Evans
