Date: 12/11/2018
Our Ref: PLA0038420
Your Ref: P/2018/0933

Dear Sir,

Grid Ref: SJ3312655319 333126 355319

Site: British Legion Social Club, Watts Dyke, Llay, Wrexham

Development: Mixed use hybrid development comprising residential development (outline), a 4,000 sq ft retail unit (outline), a boxing club (outline), a car park (full), details of access (all other matters reserved) and associated works

We refer to your planning consultation relating to the above site, and we can provide the following comments in respect to the proposed development.

Having assessed the proposal, we note the developer proposes to dispose of foul flows via the public sewerage system and discharge surface water run-off into a soakaway system or the public sewerage system. We note from the Flood Consequences Assessment and Drainage Strategy submitted in support of the above application that infiltration tests have been undertaken and it has been confirmed that soakaways would be a suitable method for surface water drainage onsite. In light of the above, we wouldn't allow surface water runoff from the proposed development to discharge into the public sewerage system. In relation to foul flows, we would advise that the flows should be communicated with to the foul sewer at manhole reference SJ33552305 located in Ffordd Newydd (highway to the East).

In light of the above and given the omission of a detailed drainage plan, we would kindly request that if you are minded to grant Planning Consent for the above development that the **Condition and Advisory Notes** provided below are included within the consent to ensure no detriment to existing residents or the environment and to Dwr Cymru Welsh Water's assets.

Condition

No development shall commence until a drainage scheme for the site has been submitted to and approved in writing by the local planning authority. The scheme shall provide for the disposal of foul, surface and land water, and include an assessment of the potential to dispose of surface and land water by sustainable means. Thereafter the scheme shall be implemented in accordance with the approved details prior to the occupation of the development and no further foul water, surface water and land drainage shall be allowed to connect directly or indirectly with the public sewerage system.

Reason: To prevent hydraulic overloading of the public sewerage system, to protect the health and safety of existing residents and ensure no pollution of or detriment to the environment.

Advisory Notes

The applicant may need to apply to Dwr Cymru / Welsh Water for any connection to the public sewer under S106 of the Water Industry Act 1991. If the connection to the public sewer network is either via a lateral drain (i.e. a drain which extends beyond the connecting property boundary) or via a new sewer (i.e. serves more than one property), it is now a mandatory requirement to first enter into a Section 104 Adoption Agreement (Water Industry Act 1991). The design of the sewers and lateral drains must also conform to the Welsh Ministers Standards for Gravity Foul Sewers and Lateral Drains, and conform with the publication "Sewers for Adoption"- 7th Edition. Further information can be obtained via the Developer Services pages of www.dwrcymru.com

The applicant is also advised that some public sewers and lateral drains may not be recorded on our maps of public sewers because they were originally privately owned and were transferred into public ownership by nature of the Water Industry (Schemes for Adoption of Private Sewers) Regulations 2011. The presence of such assets may affect the proposal. In order to assist us in dealing with the proposal the applicant may contact Dwr Cymru Welsh Water. Under the Water Industry Act 1991 Dwr Cymru Welsh Water has rights of access to its apparatus at all times.

Our response is based on the information provided by your application. Should the proposal alter during the course of the application process we kindly request that we are re-consulted and reserve the right to make new representation.

If you have any queries please contact the undersigned on 0800 917 2652 or via email at developer.services@dwrcymru.com

Please quote our reference number in all communications and correspondence.

Yours faithfully,

Alaw Jones
