Date: 15th May 2018

Dear Sir/Madam,

DEMOLITION OF EXISTING BUNGALOW AND ERECTION OF A NEW TWO-STOREY DWELLING 9 SUSSEX GARDENS, WREXHAM

Thank you for referring the above planning application received at our office 2nd May 2018.

NRW would not object to these proposals as we consider they are unlikely to have a significant adverse effect upon the interests listed

Protected Species

We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Foul Drainage

We note from our records that there is a mains sewer system available.

When connecting to the public sewerage system, the utility provider should be consulted on the proposals and be requested to confirm that the sewerage and sewage disposal system serving the development has sufficient capacity to accommodate the additional flows generated as a result of the development. This is to ensure that the development does not cause pollution of the water environment or potential deterioration in the Water Framework Directive classification

Waste

Any waste excavation material or building waste generated during the course of the development must be disposed of satisfactorily and in accordance with Section 33 and 34 of the Environmental Protection Act 1990. Carriers transporting waste from the site must be registered waste carriers and movement of any Hazardous Waste from the site must be accompanied by Hazardous waste consignment notes.

All works at the site must be carried out in accordance with PPG6: 'Working at construction and demolition sites' which are available on the following website:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

The activity of importing waste into the site for use as, for example hardcore, must be registered with Natural Resources Wales as an exempt/permittable activity under Environmental Permitting Regulations 2010. The developer should contact Natural Resources Wales to discuss the necessity for an exemption/permit for any material imported to and exported from the site.

If during construction/excavation works any contaminated material is revealed, then the movement of such material either on or off site should be done in consultation with Natural Resources Wales. Any waste excavation material or building waste generated in the course of the development must be disposed of satisfactorily and in accordance with Section 34 of the Environmental Protection Act 1990. Carriers transporting waste from the site must be registered waste carriers and movement of any Hazardous Waste from the site must be accompanied by Hazardous waste consignment notes.

Our comments above only relate specifically to matters that are included on our checklist "Natural Resources Wales and Planning Consultations" (March 2015) which is published on our website: (<https://naturalresources.wales/planning-and-development/planning-and-development/?lang=en>). We have not considered potential effects on other matters and do not *rule out the potential for the proposed development to affect other interests, including environmental interests of local importance*. The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Please do not hesitate to contact us if you require further information or clarification on any of the above.

Yn gywir / Yours' faithfully,

Ruth Prichard

Ymgynghorydd Cynllunio Datblygu / Development Planning Advisor
