Hello Mared

WG appear to have considered the proposed noise mitigation measures in quite some detail. Public Protection recommends that the revised mitigation measures detailed in the Acoustic Report should be required by Planning condition in any permission that may be granted.

Regards Nick

Hi Nick

I have received the revised Acoustic Report in accordance with Welsh Governments comments and the revised layout of the site - would you be able to send me your updated comments if you have any please?

Thanks

Mared

Hi Nick

Thanks for your comments.

To let you know, the layout of the scheme might change therefore any noise mitigation in the form of boundary treatments/acoustic fencing may be subject to change in terms of location and size – I will let you know if this is the case.

Thanks

Mared

Hello Mared

I carried out some noise monitoring at Willow Cottage yesterday afternoon.

My results were slightly higher than those in the noise report – but generally speaking in the same ball park.

I'll just be recommending that the noise mitigation measures detailed in the report are required by Planning Condition, together with the usual construction works Conditions/Advice Notes.

Regards Nick

Hi Nick ,

The agent for the application is Blueprint Architecture and the contact is Dafydd Edwards – 01978 356 500 or dafydd@blueprintarchitectural.com

Thanks

Mared

Hello Mared

I've just been looking through the noise report which accompanies the application.

The measured noise levels look to be a bit on the low side. Do you have a contact at Willow Cottage? I would like to carry out a quick snapshot of noise monitoring – just to compare to the monitoring data in the report.

Regards Nick
