

Boundary Vegetation – Afallon Glyn Ceiriog

Figures 1 and 2 shows the existing boundary vegetation along the highway adjacent to proposed development. The vegetation along the highway will not be altered during the development , however due to close proximity to the highway both sides may be required to be maintained not to impose on the local highway when required. The vegetation consists of small trees, shrubs and overgrowth. Figure 3 shows the vegetation from the east side (side of proposed development)
