Date: 10th April 2018

Dear Sir/Madam,

**ERECTION AGRICULTURAL BUILDING AND ALL ASSOCIATED WORKS.
CHERRY TREE FARM, RED HALL LANE, PENLEY, WREXHAM**

Thank you for referring the above planning application received at our office 3rd April 2018.

NRW would not object to these proposals as we consider they are unlikely to have a significant adverse effect upon the interests listed

Protected Species

We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Pollution Prevention

The applicants must minimise discolouration to the watercourse from the construction works. Silty water should be treated, either through the use of settlement lagoons, or tanks, or discharged across a grassed area. For work in river channels the use of coffer dams is recommended, to keep river water out of the working area. River crossings must be kept free from mud or dust deposits. Oil and chemical storage must be kept away from the watercourse, on an impervious base, within a bund, and secured. Absorbents or a suitable spill kit must be kept on site for use in the event of an emergency. NRW should be notified immediately of such an occurrence. The mixing, use and washing of machinery and shuttering of wet concrete and cement must be carefully controlled to minimise the risk of any material entering the watercourse. The applicant is advised to follow the guidance within Guidance for Pollution Prevention 5 "Works and maintenance in or near water":

<http://www.netregs.org.uk/media/1415/gpp-5-works-and-maintenance-in-or-near-water.pdf>

Any waste excavation material or building waste generated in the course of the development must be disposed of satisfactorily in accordance with duty of care requirements under section 34 of the Environmental Protection Act 1990. The waste shall be transported using registered waste carriers to suitably permitted or exempt sites. Transfer notes shall be kept for each load for a minimum of 2 years.

Our comments above only relate specifically to matters that are included on our checklist "Natural Resources Wales and Planning Consultations" (March 2015) which is published on our website: (<https://naturalresources.wales/planning-and-development/planning-and-development/?lang=en>). We have not considered potential effects on other matters and do not *rule out the potential for the proposed development to affect other interests, including environmental interests of local*

importance. The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

Please do not hesitate to contact us if you require further information or clarification on any of the above.

Yn gywir / Yours' faithfully,

Ruth Prichard

Ymgynghorydd Cynllunio Datblygu / Development Planning Advisor
