Subject: P/2018/0227 - Gas Pipeline, Maelor Works, Cross Lanes

Kevin

The proposed development will affect Sesswick public footpath 25. The path will require a temporary traffic regulation order whilst the works affecting the path are in progress and, if possible, an alternative route should be made available for the duration of the works.

If the path needs to remain closed beyond the duration of the initial order (6 months is the maximum duration for a temporary traffic regulation order affecting a footpath) the applicant will need to inform Wrexham County Borough Council, allowing reasonable time for the Council to apply to the Welsh Ministers for an extension to the order.

With regard to surface markers and marker posts to identify the location of the pipeline, if these are to be located on or near the footpath, I would request that the rights of way section is consulted on the location of these markers before they are installed.

Regards

Sean
