Hi Matthew/Rosina,

Thank you for the consultation with regards to the additional information of the amended Manure Management Plan.

As it stands I am still unclear from the MMP if some manure will be spread on the fields of farms listed or that all manure will be exported off site to the AD plant.

It is noted that it states, "We can confirm that 1,000 tonnes of manure will be exported to the Anaerobic Digester at Lower Park Farm, Parkside, Rossett, and therefore no manure will be applied to the land at Mulsford, Bank Farm or Horse Manse Green Farm, all manure will be exported."

It also states within the Manure Spreading Plan section of the Manure Management Plan that "All manure will be exported to the local AD plant and therefore no manure spreading plans have been included within this document."

However, in the same document it also states within Table 1 that some manure will be applied and shows the spreadable land at Mulsford, Bank Farm and Horse Mans Green Farm. Further on in the documents it states that "Manure will be spread according the annual cropping plan".

Please clarify that if all manure is to be exported to the AD plant then the MMP should reflect this. Once the amended MMP is submitted and we are consulted, I will then be able to provide our substantive response.

If you have any queries please do not hesitate to contact me.

Kind regards,

Siôn M. Williams
