Subject: P/2018/0166

Hi Sharon,

Thank you for the recent consultation on the above application.

No detailed information regarding how surface water generated by the new development on the site will be managed has been submitted, despite this being requested as part of the pre application consultation. As a minimum an indicative drainage proposal, carried out in accordance with the attached guidance note, should be submitted in support of the application. In the absence of this information the application should be refused.

If you have any questions on the above please let me know.

Many thanks

Neil
