Subject: P/2014/0905 Home Farm, Llay - Pre-determination Archaeological Evaluation

Dear Matthew

I have now received a copy of the evaluation report direct from the archaeological contractors (Cornerstone Archaeology) in relation to the pre-determination evaluation work. A copy should have been sent to the LPA via the agent or applicant. Please contact them if you have not received a copy.

The trenching has revealed that the features revealed by the geophysical survey are either of natural origin (shallow peat forming in post-glacial hollows) or relate to drainage of the fields in the 18th-19th century and these features are of low archaeological value.

We would therefore have no additional requirement for investigation here and there are no predicted archaeological impacts.

Regards

Mark Walters
