Dear Sir – PLANNING APPLICATION – P/2015/0773 TRAVELLER SITE, SOUTHSEA,
WREXHAM

I am writing with regard to the planning application above. I live directly opposite the site and am subjected on a daily basis to noise, car horns and vehicles arriving and leaving the site at all times of day and night. I leave the house at 4.30 each morning and return at around 5pm the same day and as you can imagine sleep is really important and I am constantly being woken at all times of the day and night by the noise etc.

I was under the impression that the previous application and appeal had been turned down and that an order had been placed on the travellers to leave the site and that the land had to be returned to the former green field site. I am shocked to see that a new appeal has been made and do not quite know why. Nothing has changed on the application – new buildings etc, and family reasons. The land itself has not changed and is still designated Green Barrier within the village boundary and it is outside the settlement area and so any application whether from traveller or local resident should be turned down – it is quite simple. I am baffled as to why the order for eviction has not been made and that a new planning application has been allowed. I consider that given the current financial climate that councils find themselves in that this is a complete waste of public money.

The travellers do not adhere to planning applications, this site is clearly being used for business and there is a constant police presence there with regular fights taking place amongst the travellers – usually on the road outside the camp. Something I clearly do not want to witness, I feel insecure and vulnerable as a single young woman and my rights as a local resident are being impinged upon with regard to security, noise, nuisance on a daily basis.

On the Development Plan for the area the land is clearly outside the settlement area and within the Green Barrier and policies PS1, PS2, GDP1, and T8 apply. It is also contrary to policies EC1, EC4, H9 and PS2. The current application is not different from any of the previous and I consider that this should be rejected and that the travellers be asked to leave and the land turned back to its former Green Barrier leaving the village to its previous quiet nature.

Yours faithfully
