Subject: RE: P/2016/0066 - Erection of overhead lines

Hi Jill,

I didn't want to make heavy weather of this given the protracted processes that could have ensued if we had formally objected i.e. a Pl. However, our tree officer did have concerns and the advisory was based on his wording.

Could I suggest that your contractors contact my colleague:

Jon Brewin – Arboricultural Officer

Hi Phil,

Thank you for chasing up the Form B which I have now received, whilst there are no objections there is a condition referred to in section 6.

SP Energy Networks had to remove trees that were in poor health and advised that the willows had windblow damage which will regenerate.

We cannot replant trees back where they were as they would then grow into the line.

Our contractors have advised they have removed 15 trees and suggest that the Council have a site meeting as we are not sure if the area would support the re-planted trees whilst keeping the overhead line corridor clear.

Could you advise who it would be from the Council that SP need to meet on site to discuss the matter further

I look forward to hearing from you.

Kind Regards Jill

Jill,

My apologies for the delay on the two applications I have on the book at the minute. I have completed the Form B's and they will hopefully be signed off today.

There are no objections to both and will hopefully be signed off at this end either today or tomorrow.

Hi Phil,

I refer to the information already sent to you two weeks ago.

Can you confirm if the Form B can now be cleared back to our planning team in Wayleaves at Wrexham as it is causing a delay with the remainder of the section 37 planning consent.

I have been advised by my project engineer that an ecologist Sara Cara is being present to observe all digging activities as some of the poles at Pickhill Farm are being erected shortly.

I look forward to hearing from you.

Kind regards Jill

Hi Phillip,

I have just been passed an Ecological Report for the site. And have attached for you. Can you let me know if any further information is required.

Kind Regards Jill

Hi Gill,

I've had these comments back from our ecologist. Are you able to provide us with any detail about construction methodologies for the installation of the line. I know you mentioned that NRW are involved in relation to the crossing of the river bed, but have they had any other ecological input into the process?

Regards

Phil

Whilst I have no objections to this proposal, the proposal site is known to support an exceptionally high population of great crested newts which are protected by European Regulations. The applicant should provide a reasonable avoidance method statement to minimise the risk of incidental killing or capture of newts during the work. It should include information on vegetation removal, methods of installation and storage of materials.

Thanks
Emma
