Response NRW:00960532

Dear Mr Hughes,

Thank you for consulting us on the above application.

A common pipistrelle bat has previously been recorded on site. We note that trees will be removed from the site, although native species will be planted elsewhere on site. We request that the application is referred to your ecologist in order to determine as to whether a protected species, specifically bat report may be required in support of the application. If such a report is requested, and subsequently received, please reconsult us on the results of the survey.

Kind Regards,

Gareth Thomas
