Hello Phil

I confirm that the information contained in pages 47 and 48 satisfies the requirement for a site specific DMS.

Regards Nick

Dear Steve,

Nick has passed to me your email in relation to the proposed dust control measures. We don't seem to have the pages '47 and 48' referred to.

Can you forward these through to me?

Thanks and regards,

Phil

Hello Phil

Please see the email below regarding the DMS.

I can't find the pages 47 and 48 referred to in the planning documentation Do you know where I can access these?

Page 39 doesn't contain site specific dust control measures.

Regards Nick

Subject: Ysgol Gwenfro - Dust Management Scheme

Hi Nick,

I have been forwarded your email(below) in relation to planning condition 17 covering dust management on the Scheme. The document forwarded to Philip was the **Construction Phase** Health, Safety & Environmental Plan for this specific Contract, page 39 details the Health and Safety dust control measures that will be put in place, pages 47 & 48 detail the dust control measures from the Environmental side.

The Construction of the New Building should incur very minimal dust due to the nature of the design, if however dust becomes apparent during an operation then the control measures documented will be implemented to rectify the issue. With respect to the demolition works this won't be carried out till January 2017 in which a detailed Method Statement/Risk Assessment etc closer to the date will be forwarded to Building Control as part of achieving the Section 81 Approval.

I would appreciate if you could clarify exactly what you require as we feel the documentation issued details the Control measures that will be adopted during the Construction Works especially for the New School, if the demolition of the Existing School requires more information I would be more than happy to forward the detailed Method Statements/Risk Assessment etc documentation, but this would be closer to the time of the works being carried out, currently we don't have a Demolition Contractor in place for this element of the works.

Regards

Steve Davies

Subject: Gwenfro CP School - P/2015/0952

Hello Phil

Further to our telephone conversation I confirm that the additional information submitted does not constitute a dust management scheme.

The DMS needs to be site specific and must detail the dust control measures that are to be implemented throughout the different phases of the demolition/construction works.

Regards Nick
