Fencing Panels - Palisade Paliframe

Palisade Paliframe Palisade Panel

Here is a fresh approach to garden fencing; the Paliframe is a variation on our classic Palisade fence panel. Alternate pales have been cut at an angle to create a very pleasing decorative effect. These panels and gates are ideal for creating light and airy gardens as they allow sunlight through and offer less wind resistance than solid panels.

Paliframe is unique to Jacksons and has been in our garden panel range for two to three years. It's original good looks have captured the imagination of not only residential customers, but also garden designers. Paliframe fence panels have featured in a medal winning garden at RHS Hampton Court Flower Show and also featured in Jacksons very own show gardens project at the HQ in Kent.
