Hi Simon

I've received the following response from the applicant:

'1) Ponds depth to be 2m . No mounds as such but the top of the banks will be about 0.5m above the pond level.
2) Suitable excavated material will be used to form the access tracks. Some material will have to removed from site and this will recycled as much as possible . We may require to bring in clay to line part of the ponds.
3) We will have fish deliveries 6 times a year. We will be selling the fish to wholesalers so fish collection will be 20 times a year.'

Regards

Steve

I refer to the planning application for this proposal.

Could you assist with some details, please, to enable me to carry out the EIA screening:

1. the depth of the ponds and height of the mounds
2. will the material from the excavation be used to form the roadways/ mounds? As such will the project not require movement of material on and off site?
3. the estimated pattern of vehicle movements to and from the site once the business is operational, that is deliveries and collection of fish for sale.

Thanks
