I refer to the above planning Inspection that is being appealed today.

Unfortunately I have not been able to reply sooner to your correspondence of Jan 13th and am unable to attend the appeal today.

However, your department should be aware that I live at 112 Benjamin Road and opposite to my car port the resident of 79 has had a gap left in his wall and laid hardcore for off road parking.

He has placed 2 large wall coping bricks in the road as he was denied a drop kerb. The site is very dangerous and should in no way be used for off road parking. Reversing from this area, the driver has no chance of seeing 25 meters in either direction. This address is currently appealing 3 rejections to planning permission on at this address because of the dangers, but it appears that the rules don't apply to him/her.

Please, Please stop this deliberate and total disregard for safety and don't wait until someone is seriously hurt.
