

Dear Sir/Madam

Planning application P2009 0449 Government Welsh Assembly Ref:
H6955/A/10/2122444

We still have significant concerns regarding the above due to the following reasons:-

The highways leading to the site are nearly all single track rural lanes and no pedestrian pavements. This is extremely dangerous to the general public.

The area is one of extremely low background noise and we do feel that the drilling together with lorries reversing 'beeps' will affect our peace and quiet.

We have personally experienced the most recent bore hole drilling in Shocklach and the noise of the drilling together with heavy vehicles was a constant annoyance and aggravation to the residents. I'm sure CBRE tried to eliminate the noise but unfortunately this did not happen. The roads there were B roads which is a very different matter. We actually stayed at a friend's house to experience this, and we feel that by doing this, it gave us a greater insight to the proposal and has made us more determined in our views that this not only extremely dangerous, but also a noise nuisance.

We strongly disagree with the proposal regarding the above.

Yours faithfully

Vivien Newton (Mrs)
Robert Newton (Mr)
