

Dear Sir/Madam.

With respect to the above Planning reference and Welsh Assembly Government Ref: H6955/A/10/2122444.

My family and I are residents of the Stables in Bowling Bank and formally communicated our objections to the above planning proposal during August 2009. The 2 main points of objection i.e. poor highways and noise pollution emanating from the proposed site are now more salient than ever and I feel I must further elaborate on the road issue.

The road in question that leads to the Stables housing development and then ultimately into the proposed site has suffered with the poor weather throughout the winter months and is now in need of full re-surfacing as the pot holes and surface cracks are growing at an alarming rate. To further risk this already unsatisfactory highway with regular heavy traffic would lead to undoubted damage and a sizeable bill for the roads department. Plus the massive inconvenience for local residents and businesses who have limited access and are totally reliant on these agricultural highways. The road is simply a farm track and cannot sustain any intensive wear and tear similar to many of the local lanes in the vicinity. Subjecting it to 60 days of intensive heavy traffic would simply destroy it.

I would ask that this added dimension be added into discussion when any future appeals on this subject are heard and can confirm that my initial objections remain as adamant as ever to this proposal

Yours Sincerely

Shaun Williamson
