I would confirm that I and my family have been regular holidaymakers and weekends campers at the TROTING MARSH CARAVAN PARK over a very long period and have been using the site since about 1996. As requested I have marked on the location plan my prepared pitches, which have not always been available owing to them being occupied by other tenters/campers at the time. I would mention that the HATCHED AREA has been used in regular use over the period I have mentioned, with varying numbers of campers both with annual holiday makers and week end stays. I hope the foregoing observations will suffice your needs.
