

P/2021/0309 Coxwood Farm

Hi Simon,

Apologies for the delay I have had to do some reading and digging regarding septic tanks and the information required by NRW. Every day is a school day!

As mentioned previously we plan on attaching the new cottage drainage into the current septic tank system in place. We haven't carried out this work yet until retrospective planning had been granted. I've have looked into the registration and it would appear the current system is already registered with NRW ([EPR/BE5150LM/A001](#)). See screen shot attached.

I assumed if we are given the green light to complete we would get Campagna back in to oversee building regs are adhered to including the drainage.

Best wishes,

Jimmi
