Mr K Jones,
19 Lower School Drive,
Ruabon,
Wrexham.
LL14 6RP

Dear Mr Jones,

Following my visit to site on July 1st to assess the need for a tree survey for the planned extension work to your property, it was found that this would not be necessary. The trees most closely associated with the planned work are shown on the satellite view on the following page. These are:

T01 – Sycamore (*Acer pseudoplatanus*)

T02 – Wild Cherry (*Prunus avium*)

Both of these trees are situated on neighbouring ground up a bank (Offa's Dyke) away from the house. From measurements taken, both of these trees fall outside of the RPA (root protection area) criteria set down in BS5837: 2010.

It is however recommended that both of these trees receive a 2 – 3 metre reduction to their eastern sides to allow ample space between the trees and the finished extension.

Kind regards

Rob Mays
