PIGEON HOUSE- FARM BUILDING, HANMER
FOR MR & MRS ANSON

D.N 200
S. Pemble RIBA
JAN. MMXXI

It is proposed that a traditional style single external light will be erected as pictured below;

Please note It will not be permanently left on, and meet the following guidelines;

- It will be on short period timers (≤ 1 minute) activated by movement-sensitive Passive Infra-Red (PIR) sensors.
- LED luminaires will be used due to their sharp cut-off, lower intensity, good colour rendition and dimming capability.
- 'Warm white' long-wavelength bulbs with reduced UV output will be used.
- Internal luminaires will be recessed where installed in proximity to windows to reduce glare and light spill.
- The lights will be positioned no higher than 2m to ensure that the eaves of the building are not disturbed or areas above the roof.
