Hi Ray

Thanks for the watching brief report.

There are a few issues with this report before we can approve it and discharge the related condition:

1. There is no archive section stating where the final digital archive will be lodged. Normally a high-resolution PDF copy of the report alone will be sent direct to the HER via Gary Duckers (HER Officer) gary.duckers@cpat.org.uk The whole digital archive should be sent to the NMR, RCAHMW, Aberystwyth. We would need a statement on this to be added to the report and confirmation by email when the archive has been dispatched.
2. There is mention of a site plan, but the plan has not been included ! This is essential for future readers of the report to be able to identify where the foundation trenches were that you observed and particularly to accurately identify the location of the well. A site plan locating these features should therefore be added to the report.

We have no issues with the proposed geophysical survey, but it would be useful to have a separate detailed WSI outlining the methodology to be used and stating the reporting and archiving procedure.

I would be grateful if you could send a revised watching brief report addressing the points raised above.

Kind regards

Mark Walters
